Connecting India  
Faster

## BSNL NGN Network and its benefits

Next-Generation Network (NGN) is IP based, state of the art new telephone technology that handles multiple types of traffic (such as voice, data, and multimedia). Key features of NGN Network are:

- i. Convergent multimedia services which provides voice, broadband and video calling to all customers.
- ii. NGN can deliver various user friendly value added services like video call, close user group, video conferencing etc.

### Delivering Value added Services

NGN network will be able to set the platform to enhance the existing telephone network capability to launch any IP based new services to subscribers such as Pan India IP Centrex (closed user group), Multi Media video Conference, video call and Fixed Mobile Conversion services etc.

### Key Service offering:

**Convergent Conference** to unleash your conferencing value. Convergent Conference solution enables NGN customers and non-NGN customers to use different terminals to join the same conference. The Convergent

Conference solution supports multiple accesses, such as voice access, HD video access, data access, web access, and Telepresence access. Furthermore, it can interwork with traditional conference systems, such as the H.323 legacy devices or Cisco's conferencing system. One NGN user can set up conference with 30 participants. Conference can be available under both prepaid and post paid payment mode.
