

BSNL & Dimension Data launch enterprise cloud services

BSNL and Dimension Data, the leading global ICT solutions and services provider jointly announced the launch of their Enterprise Cloud Services in India. Based on Dimension Data's Managed Cloud Platform (MCP), BSNL forays into the Enterprise Cloud services space through its Internet Data Centres (IDCs).

Based on a standardised architecture, the MCP offers enterprises the advantage of being able to support public, private and hybrid cloud models. All MCPs are enter-

prise-ready, offering multiple layers of security, administrative controls, highest availability SLAs, 24x7 phone support and integrated management capabilities.

Specifically architected for large enterprise needs, these services have already been acknowledged as 'Leaders' in Gartner's Magic Quadrant for Cloud IaaS, and have more than 1,000 clients globally.
